**REASON FOR ALLOWANCE**

- 1) The following is an examiner's statement of reasons for allowance:

The prior art teaches naming each file of a set of files, each file representing either a page image or an image component of a page image, according to a naming convention. Specifically, the prior art is directed to determining a time order in which certain images stored on an image server are displayed in order to create an electronic album.

The prior art is the idea of a multi-page document; using a naming convention for the files; applying a writer application which recognizes the files to write a multipage documents or naming a file within the set of files as a directory of source files. Specifically, the prior art does not teach naming a file within the set of files as a directory of page directories and wherein the page image components are MRC profile layers; the directory causing the writer application to generate a multi-page document with each page directory corresponding to a page, wherein each page directory includes a plurality of files, each file corresponding to a page image component for a single page image. The prior art does not teach these limitations when viewed in combination with the other limitations of the claims in a method of organizing image data to create a multi-page document.

- 2) Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
